SIZE NOTE: Everflex wetsuits offer a tighter fit while Definition wetsuits tend to be more generous. Everflex suits are built with high-stretch neoprene and numerous high-stretch neoprene panels that provide a tighter fit initially, but stretch after a few dives. Definition wetsuits, in contrast, have fewer stretch panels so tend to maintain their original cut after a couple of dives. These charts are intended to act as a guide only and apply to most SCUBAPRO wetsuits. We recommend all suits be tried on to ensure a perfect fit. Not all sizes are available in all models.
